Institute Bictia /
Bogotá, Colombia
January 2019 - March 2019
Course based on HTML5, basic JavaScript, CSS3 and Bootstrap.

SKILLS

Web Design

Back-End Programming

Database

WORK EXPERIENCE

CONTENT DEVELOPER

Atento / Bogota, Colombia / August 2022 - Present

Played the role of developer in both Front-End and Back-End area generating automation systems based on user needs, pages were generated for atento campaigns such as Colpatria, Davivienda, Falabella, Claro, Didi Traiding, Runt, among others, which have advanced web design in Css (Multiple Libraries) and JavaScript (Design Effects), JavaScript base logic (Functionality).
Such developments can be found in the portfolio: https://avendanoispepe.github.io/portafolio/

PRACTICAL STAGE

Clìnica nueva / Bogotá, Colombia / January 2021 - July 2021

Three different systems were generated in the practical stage: Adverse Event Reporting System (SIREA-CN), Internal Statistical Reporting System of the new clinic (INDICATORS) and Inventory Control System of SEDE C. Each system was developed from scratch and has a user-friendly design, a functionality according to the requirements of the system and its respective database, user manuals, instructions and technical manuals were also generated for each system developed.

PROGRAMMING PROJECT - CONJUNTO WEB

National Apprenticeship Service SENA / Bogotá, Colombia /July 2019 - December 2020

Information system created specifically for the residential complex "Torres de Lucerna" in order to improve the management of administrative and security processes. Developed with all the knowledge previously learned especially in the "Back-end" part where the programming language "Java" was implemented, with its respective database in MySQL and a specialized design in Bootstrap, CSS3 and JavaScript (including its multiple plugins such as: DateTable, SweetAlert2, etc.).
